Dry Mop Cactus is designed to work like a modern broom. A broom that picks up dust and dirt, and which also has a cleaning effect. The cleaning effect is achieved by the white ACTEX® loops.

The mop is effective on structured floors and for picking up larger dirt particles like sand and breadcrumbs. Dry Mop Cactus has a base made of extra long loops and therefore reaches into grouts on ceramic floors and other uneven floors. These properties make the mop perfect for areas like kitchens, entrances, bathrooms, etc.

The fringes around the mop are perfect dust collectors.

Dry Mop Cactus is also recommended on floors where water spots are common, in places like kitchens, laundries and bathrooms.

How do you use the Premium Dry Mop Cactus?

The dry mop is always used completely dry, without water.
Dry mop before damp mopping for best possible results.

Where can you use the Premium Dry Mop Cactus?

Use it for all types of floors. The design of the mop makes it specially suited for heavily soiled areas such as kitchens, entrances, bathrooms, toilets, laundries, garages and for uneven floors like ceramic floors. The mop is also suitable to pick up pet hairs.

Care:

Machine wash at up to max 92°C, 198°F.
Tumble dry at up to max 92°C, 198°F.
Never use chlorine or other bleaches.
Use an environmentally friendly detergent.
Never use softeners in the rinse water.
Wash separately because the products will otherwise gather lint from other fabrics.
