

# Concept trolleys.

ACT® Multi-Purpose Trolley Large

The hub of The Swedish water-based cleaning concept is our Multi-Purpose Trolleys. Two things have been particularly important in the development of the trolleys: Flexibility and ergonomics. The flexibility makes it easy to equip the trolley according to whichever type of cleaning is to be done. It is also easy to adapt the trolleys to individual preferences, e.g. working height, and how the user wants to arrange the trolley equipment in order to work as effectively and as smoothly as possible.

ACT® Multi-Purpose Trolley Small

THE SWEDISH WATER-BASED  
CLEANING CONCEPT

## Multi-Purpose Trolley Small

The pictures show a standard equipped trolley. A wide range of accessories are available. The small trolley is particularly suited for cleaning small areas like offices, day care centres, private enterprises etc.. It has one year guarantee.

The hub of The Swedish water-based cleaning concept is the Multi-Purpose Trolley. The working height of the trolley is easy to adjust. Handles, as well as the Uni-holders attached to the handles for cloth boxes, are easy to raise/lower to suit both tall and short people. The adjustment is made quickly with a simple grip. The soft grip handles are ergonomically angled for the best comfort.

The trolley has four holders, so-called Uni-holders, for the laundry bag, cloth- and accessory boxes. These have identical frame measurements, making it possible for the user to place laundry bags, cloth- and accessory boxes on

whichever part of the trolley they prefer. The small trolley is equipped with one cloth/accessory box with lid for transporting and storing pre-dampened cloths, two cloth/accessory boxes for storing small accessories and one small laundry bag for transporting used material.

For mops the small trolley is standard equipped with a 25 cm mop case with lid, for transporting and storing pre-dampened mops. Depending on the type of area cleaned an additional mop case should be added, 40 cm or 60 cm, to be placed in the rear mop case holder.

The large basket is for storing bulky material.

A sheet with twelve stickers, five different colours, is enclosed. The stickers are used for marking the cloth box lids for colour coded cleaning.

Finally the trolleys is easy and fast to assemble, no tools are needed.

CLEANING CONCEPT

## Cloth/Accessory Boxes and Solutions

Boxes without lid are used for storing accessories and with lid for keeping pre-dampened cloths. The boxes fit the Uni-holders and can therefore be placed on whichever part of the trolleys preferred. The boxes also fit the cloth/accessory box holder art.no. 755130.

**Length:** 25 cm  
**Width:** 19 cm  
**Colour:** Medium grey  
**Material:** P/P

**Volume:** 7 l    12 l  
**Height:** 17 cm    31 cm

The cloth/accessory box lid is designed to seal well to ensure the cloths retain the right degree of dampness. On top of the lid there is an elliptical recess where to fix the colour coding stickers.

The lock prevents theft in places like public areas, hotel corridors etc.. All the locks are identical, so if the trolleys is equipped with more than one lid with lock, one key can be used for all locks. Please note the lock doesn't make the box thief proof, it only prevents theft. Therefore it's not recommended to keep valuable belongings in a locked box.

For colour coded cleaning and recycling. Our sheet with twelve stickers, five different colours: 4 red, 2 blue, 2 green, 2 yellow and 2 white. The stickers are fixed on top of the cloth/accessory box lid or the waste bag lid in the elliptical recess.

**Article:** 755040 Stickers Colour Coding  
**Material:** Vinyl

A holder for the cloth/accessory box placed front right on the large trolley. The design of the holder is asymmetric and has three fasteners. Therefore it can be positioned in three different ways:

1. The most common way; the top hook facing out-wards. This way it can be used even when the trolley is equipped with the waste bag housing.
2. With the top hooks facing in-wards, the trolley gets

more narrow. This way it can not be used with the waste bag housing.

3. When a 60 cm deep frame is placed in the mop case/frame holder then the cloth/accessory box needs to be moved forward. This is done by just mounting the holder with only two of the three fasteners.

CLEANING CONCEPT

## Waste Bag Solutions

On a standard equipped trolley one waste bag, 100-130 l can be used. With an additional pair of waste bag holders two smaller bags, 60-70 l can be used.

**Article:** 755010 Waste Bag Holders, 1 pair  
**Colour:** Metal  
**Material:** Steel

There are two elliptical recesses on top of the lid where to fix the colour coding stickers.

**Article:** 751010 Waste Bag Lid  
**Colour:** Light grey  
**Material:** ABS + steel

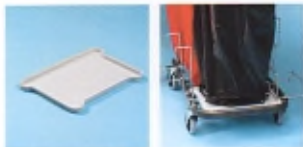

For colour coded cleaning and recycling. One sheet with twelve stickers, five different colours; 4 red, 2 blue, 2 green, 2 yellow and 2 white. The stickers are fixed on top of the cloth/accessory box lid or the waste bag lid in the elliptical recess.

**Article:** 755040 Stickers Colour Coding  
**Material:** Vinyl

The housing hides away the waste bag for a more representative appearance. The large neutral flat surface is ideal for advertising. The housing is opened easily by first lifting the front cover upwards then outwards and down. Now the waste bag can be taken out and replaced with a new one without any heavy lifts.

**Article:** 755020 Waste Bag Housing

CLEANING CONCEPT

## Vacuum Cleaner Holder and Laundry Bags

Fits the most common cylinder vacuum cleaners on the market. A hook for the cord and a rubber holder for the vacuum cleaner handle tube is included in the kit. The vacuum cleaner holder can only be used on the large trolley, it can also be used when the trolley is equipped with the waste bag housing.

**Article:** 751000 Vacuum Cleaner Holder  
**Weight:** 1,1 kg  
**Colour:** Dark grey  
**Material:** Steel

The laundry bags fit the Uni-holders and can therefore be placed on whichever part of the trolleys preferred. The bags are fastened to the Uni-holder with a draw string stopper which also makes the bags easy to carry and handle separately. The small laundry bag is made so a mop case or bucket can be placed underneath.

For washing follow ACT's general washing instructions. The bags are damp-proof and not suitable for washing laundry in. Dirty laundry bags should be washed separately.

## Mop Cases and Solutions

Mop cases for transporting and storing pre-dampened, damp and wet mops. The cases and lids are designed to seal well to ensure the mops retain the right degree of dampness. The shape of the lid makes it possible to stack several cases on top of each other.

### Mop case capacity:

damp-41, 44: 20 mops  
damp-42: 35 mops  
damp-43: 15 mops  
wet-61: 12-13 mops

**Article:** 751030 Mop Case, 25 cm

**Material:** ABS

The single mop case holder holds one mop case or when stacked, two cases. The holder can be placed either on the front or rear end of the trolley.

**Article:** 755090 Mop Case Holder, Single  
**Colour:** Metal  
**Material:** Steel

When there is a need for transporting a large number of mops or many different kinds, then the capacity can be increased by equipping the trolleys with a double mop case holder.

Two mop cases can be put on the double mop case holder or up to four cases when the mop cases are stacked. The holder is placed on the rear end of the trolley.

**Article:** 755100 Mop Case Holder, Double  
**Colour:** Metal  
**Material:** Steel

The single mop case/frame holder holds one mop case or when the mop cases are stacked, two cases. It also works as a holder for the mop frame and vacuum dust nozzle when the handle is placed in the handle holder. The holder is placed on any side, left or right, on the trolleys.

**Article:** 755110 Mop Case/Frame Holder  
**Colour:** Metal  
**Material:** Steel

## Spare Parts

Mounting instruction: Remove the old handle grip first. Lubricate the metal part of the handle first with soap or anything similar. Then finally slide on the handle grip.

**Article:** 733600 Handle Grip, 1 pair  
**Colour:** Black  
**Material:** Softex rubber

### 733068 Mounting Kit

It consists of:

**Number:** **Description:**  
2 pcs Wing handle stems  
1 pc Wing handle stem  
2 pcs Flag m5x15  
2 pcs MRS M5x15 with locking nut

**Mounting papers:**  
All holders  
Handle and wing flag holder  
Cover base / base frame  
Mop handle holder plate

**Colour:** Grey/black/metal **Material:** PU/PP+steel-PA 6

THE SWEDISH WATER-BASED  
CLEANING CONCEPT

## Multi-Purpose Trolley Large

The pictures show a standard equipped trolley. A wide range of accessories are available. The large trolley is particularly suited for cleaning larger areas like hospitals, schools, airports etc.. It has one year guarantee.

The hub of The Swedish water-based cleaning concept is the Multi-Purpose Trolley. The working height of the trolley is easy to adjust. Handles, as well as the Uni-holders attached to the handles for cloth boxes, are easy to raise/lower to suit both tall and short people. The waste bag holder is also adjustable and has a separate holder for liner bin bags. The adjustment is made quickly with a simple grip. The soft grip handles are ergonomically angled for the best comfort.

The trolley has six holders, so-called Uni-holders, for laundry bags, cloth- and accessory boxes. These have identical frame measurements, making it possible for the user to place laundry bags, cloth- and accessory boxes on whichever part of the trolley they prefer. The large trolley is equipped with two cloth/accessory box with lid for

transporting and storing pre-dampened cloths, two cloth/accessory boxes for storing small accessories and two large laundry bags for sorting and transporting used material.

For mops the large trolley is standard equipped with a 25 cm mop case with lid, for transporting and storing pre-dampened mops. Depending on the type of area cleaned an additional mop-case should be added, 40 cm or 60 cm, to be placed in the rear mop case holder.

The large basket is for storing bulky material and the front right large cloth/accessory box is particularly suitable for storing rolls of waste bags, mop case lids, disposable cup etc..

A sheet with twelve stickers, five different colours, is enclosed. The stickers are used for marking the cloth box lids for colour coded cleaning and the waste bag lid for colour coded recycling.

Finally the trolleys is easy and fast to assemble, no tools are needed.
