

# **PREDATOR CX 300HP**

**Deluxe 12-Gallon, Dual-Pressure,  
Hot-Water Tank Extractor**

For extraordinary restorative hot-water carpet cleaning, the **Predator CX 300HP** is the perfect machine.

The CX 300HP, which covers 750 sq. ft. per hour when used with a 12-in. wand, is the deluxe 12-gallon model of the Predator line. It combines adjustable pressure (75 psi for upholstery, drapes and stubborn areas - 300 psi for sensational deep-nap cleaning) with incredible suction for the ultimate in cleaning power. Hot, high-pressure solution is literally blasted into the carpet, and then immediately extracted for a deep cleaning that's 50 percent more effective than cold water extraction. The CX 300HP comes equipped with a Smart Circuit Locator, which indicates when an additional electric circuit is located to power the Instant Heat Exchanger. This heating element keeps consistent 212°F (100°C) water on hand for the entire job. A special By-pass Switch is also included for times when no additional circuit can be located.

A tip-back feature on the CX 300HP allows easy access to the powerful vacuum motor; industrial 3-stage, positive-displacement pump; Instant Heat Exchanger and all inner workings of the machine for repairs and maintenance.

FLOAT SHUT-OFF	Ball type		

All Predator models are equipped with large, international-symbol rocker switches for easy machine operation.

All 12-gallon Predator models come with a removable funnel to reduce spilling when filling the solution tank.

Use the three-jet wand pictured above (part # 4097101) with the Predator CX 300HP. It must be ordered separately.

Each machine comes with a built-in cord wrap for convenient storage of cords.

Large, 8" non-marking back wheels make transportation on stairs easy.
